

It seems strange to me that the U.S.A. seems to lag the other nations in the "No Code" implimentation. As a member of Army MARS, I have no problem passing info around the world. I suspect there are thousands of hams that could be utilized during disasters that are unable to participate due to current restriction. At 75yo Oct 2,2003 I find it too dificult to learn a new language. 73 de "Doc"
